Course Objectives:

Upon successful completion of the course, the student will be able to:

- Understand the stock and futures markets as a whole, day to day trades and long term investments.
- Identify and execute technical trading strategies based on the formation of various Japanese candlestick formations.
- Interpret the meaning of economic and technical indicators on multiple timeframes.
- Calculate the levels of support and resistance in a trade to manage risk and maximize profit.
- Assess and implement effective equity management strategies.
- Interpret stocks and market trends that impact price and effectively draw trend lines and counter trend lines on a chart.
- Understand buy and sell zones for sound equity management and to maximize profit.
- Identify trading accumulation, consolidation, and sideways movement as risk and identifying opportunities.

- Understand the Alphabetic boundaries of a stock and their movements in price valuation over time to assist in predicting price movements.

Qualify for Tuition Reimbursement & WTI Diploma:

There is a 2 process phase to receive your tuition reimbursement and diploma from WTI (every student eligible) and a 3 process phase for each student to get funded of up to \$50,000.

Phase 1: while in the course education program:

- Complete Homework
- Pass Daily Quizzes
- Pass Final Exam
